ALL NEW CLYMATE IQ®

HIGH EFFICIENCY
Energy Star Certified Model

Energy Star Efficiency Meets Advanced Precision –
Hold Sensitive Foods Longer with Confidence and Control

New High Efficiency "PHTT-CV-HE" Model. Save money on energy costs while getting discounts on certified equipment. This highly efficient model is in final certification with the Energy Star Test Standard V2.0.

Touch Screen Controls. Just like with our other PHTT series, the user individually sets temperature and relative humidity, with the added capability of shelf timers, HACCP data collection, and more.

Automated Controlled Venting. The Clymate IQ® technology system intuitively holds tight tolerances in temperature and humidity by recognizing fluctuations and then releasing humidity via chimney vent when levels exceed user's set point.

MODEL: **PHTT-12-CV-HE**
